Natural Resources Conservation Program Highlights

South Dakota Department of Agriculture Division of Resource Conservation & Forestry

Our mission is to conserve, protect, improve, and develop the natural resources of South Dakota. The division accomplishes this by providing advice and assistance to other state agencies and private landowners. This assistance is provided through state and federal programs.

Executive Summary Coordinated Natural Resources Conservation Fund

The Coordinated Natural Resources Conservation Fund was established by the State Legislature in 1992 to implement goals and objectives identified in the South Dakota Coordinated Plan for Natural Resources Conservation. The plan targets reduction of soil erosion, improvement of rangelands, and improvement of water quality and quantity, enhancement of wildlife habitat, increased public awareness of natural resources, funding, and use of renewable energy.

Funding for the Coordinated Natural Resources Conservation Fund is provided by state law SDCL 10-47B-149. This law states \$500,000 will be deposited into the Coordinated Natural Resources Conservation Fund on July 1 of each year. The Coordinated Natural Resources Conservation Fund is used to provide cost share grants to South Dakota conservation districts. Grant applications are reviewed, approved, and awarded by the State Conservation Commission. The Division of Resource Conservation and Forestry administers conservation programs on behalf of the State and the Conservation Commission.

1993—2015 Fund Disbursements and Revenue
